

**PROBRASTE<sup>P</sup>** is a very elegant step nosing profile used to improve slip and slide resistance on the step. Made in polished brass and anodised aluminium, the upper part is knurled to increase adherence. Compulsory in public buildings to comply with accident-prevention regulations. Recommended for elegant, refined surroundings and for steps in wood, tiles, melamine-coated/laminated wood, marble or natural stones. Width: 8, 10, 12,5 mm.

## EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1: Choose the PROBRASTE<sup>P</sup> in the required width and colour according to the thickness of the tile (stairs). 2: First fix the riser part, placing it at the correct and final height. 3: Fill the empty spaces under the profile with the tile adhesive. 4: Apply the adhesive to the tread, lay the profile with the punched base fully sunk into the adhesive and align the profile so that its lip covers the edge of the riser tile. 5: Lay the tread tiles, aligning them so that they are flush with the upper and rear part of the profile and filling the internal part with adhesive. Oxidation marks in the polished/natural brass range may be easily removed with specific chemical products (Sidel-Smac).

## COLOURS

(for a precise assessment of colours and finishes, see the relative enclosed sheet)

ON - Natural Brass

OL - Pol. Brass

AN - Natural aluminium

AA - Anod. silver alu.
