

The **TERMINAL** range comprises a large assortment of perimeter joint or edging profiles in aluminium covered in twenty-seven wood-effect finishes: light maple - dark maple - light beech - dark beech - light durmast - dark durmast - light cherry - dark cherry - walnut - wenge... plus six anodised finishes (3 available on demand). They are used in various laying situations. Ideal as an edging profile for wood parquet, laminate and melamine-coated floors. They finish the floor where it joins to abutting surfaces, windows, glazed areas, doors, terraces and may also be used for joining two floors: wood/tiles, wood/carpeting.

TERMINAL

ALUMINIUM
27 wood finishes and 6 anodised finishes

ANODISED ALUMINIUM (6 anod. al. finishes of which 3 on demand)
bar length 2,7 LM - pack. 20 Pcs - 54 LM

| Article | H mm | | |
|------------|------|--|--|

terminal - outer profiles

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1: Choose the TERMINAL according to the required height and finish and fix with screws and screw anchors or with glue/silicone; the profile must be placed next to the abutting surface e.g. wall, glazing, etc. 2: Align the laminate/melamine/wood floor, ensuring that a large enough gap is left to accommodate the natural expansion between the floor and the profile (approx. 3/10mm on one side).

COLOURS

(for a precise assessment of colours and finishes, see the relative enclosed sheet)
