

**PROJOLLY SQUARE** is a square corner bead profile in anodized, polished and brushed aluminium that can be applied on external corners of coverings. It can be used to close the perimeter of coverings, like a connection profile between step tread and riser of stairs coated with ceramic and natural stone tiles and also as separation profile for floor and wall coverings. Its particular section and elegance, the availability in nine finishes and special pieces such as internal and external corners, end caps and joints make **PROJOLLY SQUARE** a much sought-after profile that allows an elegant workmanlike application.

### EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose "PROJOLLY SQUARE" according to the tile thickness and desired finish.
2. Cut "PROJOLLY SQUARE" to the desired length and apply the adhesive on the support where the profile will be laid.
3. Press the anchoring flange of "PROJOLLY SQUARE" into the adhesive.
4. Lay the tiles, aligning them with the profile leaving a 2 mm joint. Remove immediately all remains of adhesive from the surface of the profile.
5. Fill the joints between the profile and the tiles with grout, in order to avoid water stagnation. Remove immediately all the remains of grout from the surface of the profile.
