1. Choose the PROFIXER LINE SYSTEM profile in the required type and finish. 2. Cut the profile to the required length. 3a. For the version with screw anchors: make 5 drill holes per linear metre on the floor using a Ø 7mm drill, insert the anchors into the relative groove/channel of the profile and with the help of a rubber/plastic hammer, tap evenly over the surface until the anchor slots into the hole. 3b. For the version with tapdown aluminium base: first insert the base into the groove/channel of the "TOP" profile and then fix or glue the base to the floor; alternatively first fix or glue the base to the floor and then insert the 'profile. 4. Close the profile, applying uniform pressure, either manually or with the help of a rubber hammer.
